WE PROUDLY BRING YOU

E-Flow
PERNOD RICARD
TURKEY
Case Study

- *E-Flow is customised 100 % to our needs*
- *Our processes are running smoothly since 2017*

History:

- *As members of the Pernod Ricard Group – world no. 2 in the wines and spirits industry, we are proud to manage a prestigious portfolio of internationally recognised brands, of which 19 are counted amongst the global top 100 amongst the wine and spirits brands! Our brands include famous names such as Absolut Vodka, Havana Club Rum, Malibu Coconut Rum, Kahlúa Liquor, Monkey 47 Gin, Chivas Regal Whisky, Jameson Irish Whiskey, The Glenlivet Single Malt Whisky, Martell Cognac, and Perrier-Jouët Champagne.*

Challenges:

We needed a whole purchasing system starting from the purchase request, including an approval mechanism, till the invoicing of the purchase order. We also needed to monitor, control and report the process history. Therefore we wanted to eliminate the manual information transfer within the organisation and reduce our work-load.

Why E-Flow:

Among many alternatives, we have chosen E-Flow because it was able to integrate with our existing ERP system. We were also convinced by the Netoloji's references and their know-how.

Outcome:

We have designed and revised our processes together with Netoloji. We have completed the implementation of 4 pillar processes like Purchase, Expense Management, Busines Travel and Paperless Invoicing processes successfully with Netoloji's support. Thus, we have reduced our work-load by eliminating manual and paper work. Currently we can monitor, report and archive the processes easily. E-Flow has been 100 % customised to our needs.

Testimonial:

Netoloji were able to provide necessary support to our dynamic request through the project implementation phase and ran the extra mile for us.. 'Enis YALIM, Supply Chain Director
