

Are you ready
to meet the limitless
world of Netoloji?

 **netoloji**®

Think Limitless, Create With **No-Code**.

What is BPM?

Business Process Management (BPM) systems are at the heart of the digital transformation of businesses. Business processes are a set of steps, tasks and activities that make up the functioning of an organization. These systems digitize the business processes of organizations for more effective and efficient management, and provide modeled in such a way.

Why? e-flowBPM®

Possible to
Process
Management with

- **Easy**
- **Safe**
- **Limitless**

E-Flow BPM is a platform where you can easily design business processes with its "drag-and-drop" structure.

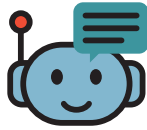

With E-Flow, you can design a workflow process compatible with the number of users and business process for organisations of different scales and start using it instantly. You can also reshape it according to your changing needs. You can use the ready-made processes of E-Flow BPM with low investment cost, or you can adapt them to your own needs.

Think Limitless, Create With *No-Code*.

Our Distinctive Features

**Drag-and-Drop
Technology**

**Artificial
Intelligence
Integration (AI)**

**Mobile
Application**

**ERP
Integration**

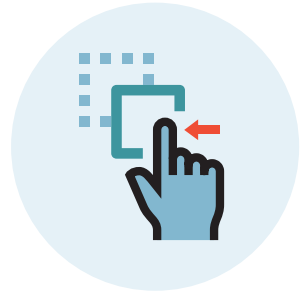

**Cloud
Model**

**Web and Mobile
Compatible**

Drag-and-Drop Technology

You can manage your business processes quickly and effectively with E-Flow's drag-and-drop structure without any coding knowledge.

Artificial Intelligence (AI)

With E-Flow's ChatGPT integration, you can access ready-made processes, increase the efficiency of your business processes and make your business more flexible and competitive.

Mobile Application

With the mobile app, you can manage your business on the go and mobilize your entire team. You can develop your mobile application without writing code.

ERP Integration

You can easily integrate with the most preferred ERP applications through ready-made integration components.

Cloud Model

You can implement E-Flow BPM Cloud for a monthly license fee with no server costs. You can always use the latest version without incurring any additional cost.

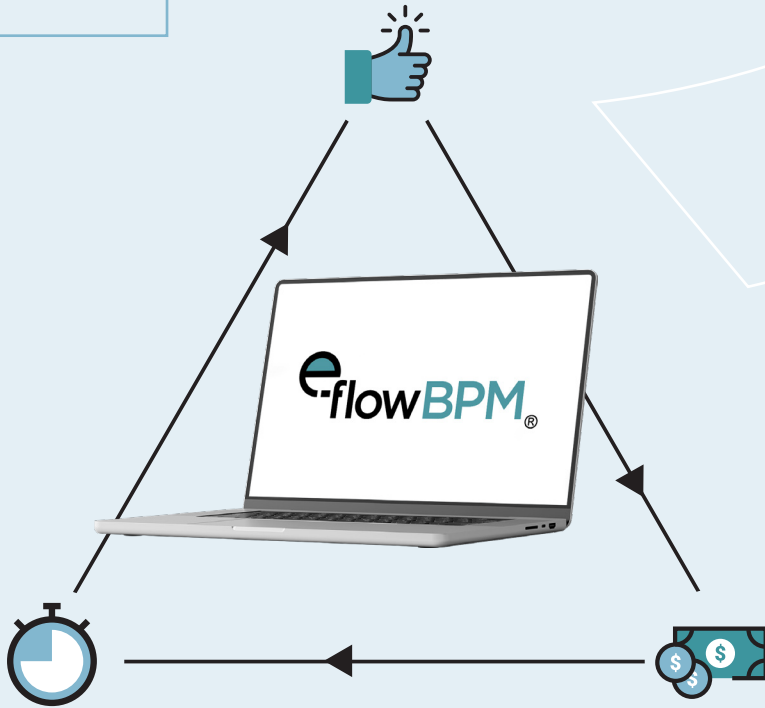

Web and Mobile Compatible

With its web and mobile interface, you can access the workflow management application E-Flow BPM from anywhere, anytime you need it.

Optimized your productivity through business processes to the highest level.

Productivity

Time

It saves time by managing your work with automation.

Cost

It minimizes your costs and increases your profitability by preventing operational losses.

Privileges of Your Business with e-flowBPM®

Kanban Board

With visual tool support, you can manage project processes, improve workflow, simplify team communication and balance workload.

Gantt Chart

By visualizing the project schedule, you can control the planning, management and monitoring of processes.

Timeline Template

You can plan your processes by creating timelines of events, tasks and actions specific to your project.

Powerful Integration

You can easily integrate it into your existing ERP application.

Approval Mechanism

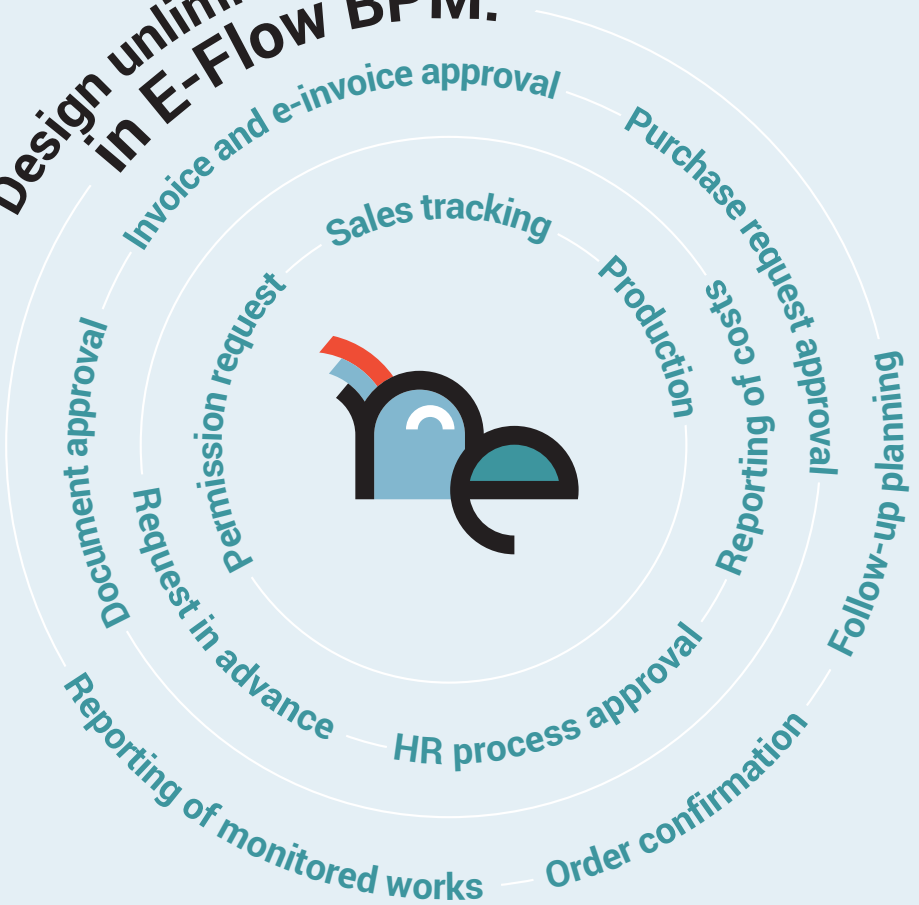

You can automate your manual business processes that require approval.

Reporting and Analysis

With the advantage of fast analysis and instant reporting, you can set the right strategic goals.

Design unlimited processes in E-Flow BPM.

No-code removes the barrier of “coding” between ideas and solutions.

In no-code applications, you can quickly design business processes without having coding knowledge.

You can adapt your processes to changing needs much more easily than you might expect.

With no-code platforms, you can empower your existing IT teams and developers by providing them with added ease.

Develop Apps Without Coding!

Think Limitless, Create With No-Code.
